## PROFILE

Energetic junior developer with solid experience in mobile and web development, primarily using Flutter, CodeIgniter3, Laravel, and ASP.NET Core. Proven track record delivering functional apps and enhancing systems across full development life cycles. Passionate about clean code, backend logic, and building scalable systems. Adept in cross-functional collaboration, UI/UX, and data handling.

## WORK EXPERIENCE

**Mobile Apps Developer (Flutter, CodeIgniter3, MySQL)**

**GWIP Sdn. Bhd. | May 2024 - Present**

- Developed and maintained cross-platform mobile apps using Flutter for Android devices.
- Implemented state management solutions using Provider, setState, and Riverpod for scalable and maintainable app architecture.
- Introduced camera, barcode scanner, and QR code scanner functionalities using third-party Flutter plugins to the team and has been using it ever since.
- Designed RESTful APIs with CodeIgniter3 to support multiple department-level apps.
- Structured and managed MySQL databases with phpMyAdmin for backend services.
- Collaborated closely with internal teams to deliver app functionalities under tight timelines.

## WORK EXPERIENCE

### **Software Engineer (ASP.NET Core, C#, MSSQL)**

**SATO Auto-ID Malaysia Sdn. Bhd. | Aug 2023 - Feb 2024**

- Enhanced multiple enterprise systems frontend including Fixed Assets Data Collection System and Event Management System to improve their data filtering logic and data upload efficiency using .csv file to scale with existing data table.
- Improved Label Issuing Systems (LIS) frontend and backend according to client's requirements on Label design and content to match their current label setup.
- Conducted UAT and provided on-site user training for improved adoption.
- Delivered and performed custom enhancements of Asset Tracking System to client as well as design new label layout and content to match with the client's current asset tagging activity.
- Wrote a clear and concise user manual for each of the improvement and enhancement project in order to avoid further confusion.

### **Software Developer - Internship**

**H-Drones & Robotics Sdn. Bhd. | Mar 2023 - Jul 2023**

- Created UI/UX mockups for AI Gate project used by Honda Service Centers via Figma.
  - Supported backend logic using Python and assist Flutter mobile apps on frontend improvement.
  - Performed drone mapping operations using Mavic 2 and DroneDeploy software.
-
