MUF APP SUITE

Platform: Mobile Apps
Flutter + CodeIgniter3 + MySQL

What it is:
 A collection of role-specific mobile apps developed to manage and streamline issue reporting and resolution processes across departments.

Who it is built for:
Warehouse staff, Staging department, Production Supervisors, and Leaders.

What it solves/accomplishes:
Enables efficient issue tracking by allowing staff to submit reports using barcode authentication. Supervisors can review and assign statuses, while leaders finalize and take necessary actions—all within their respective apps. It improves cross-department communication and accountability.
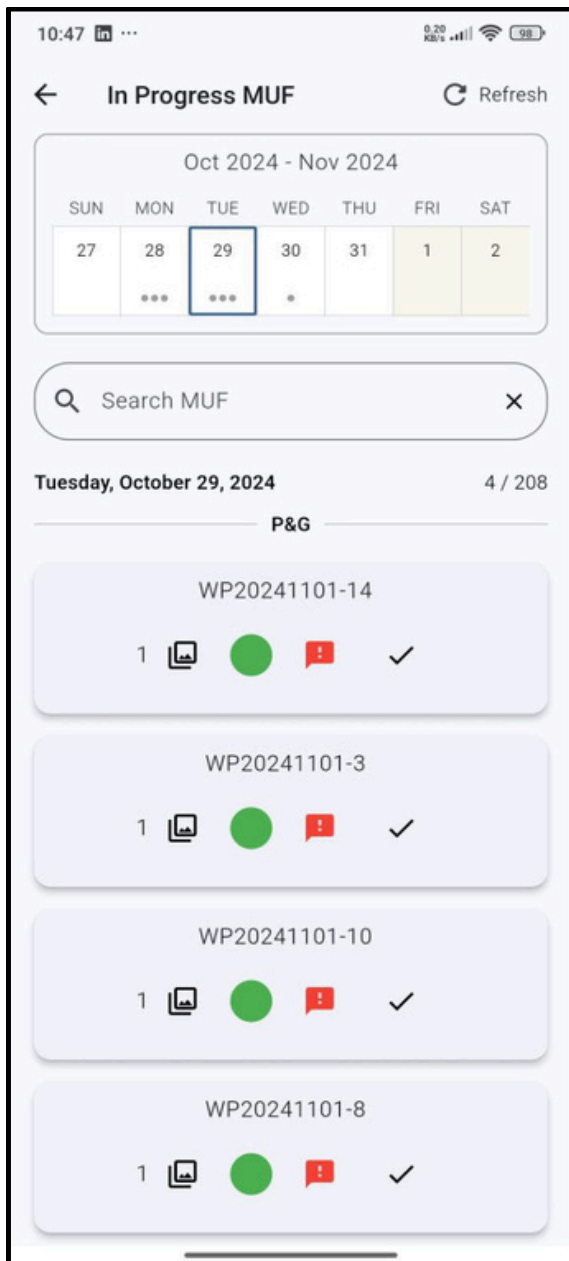

Staging App
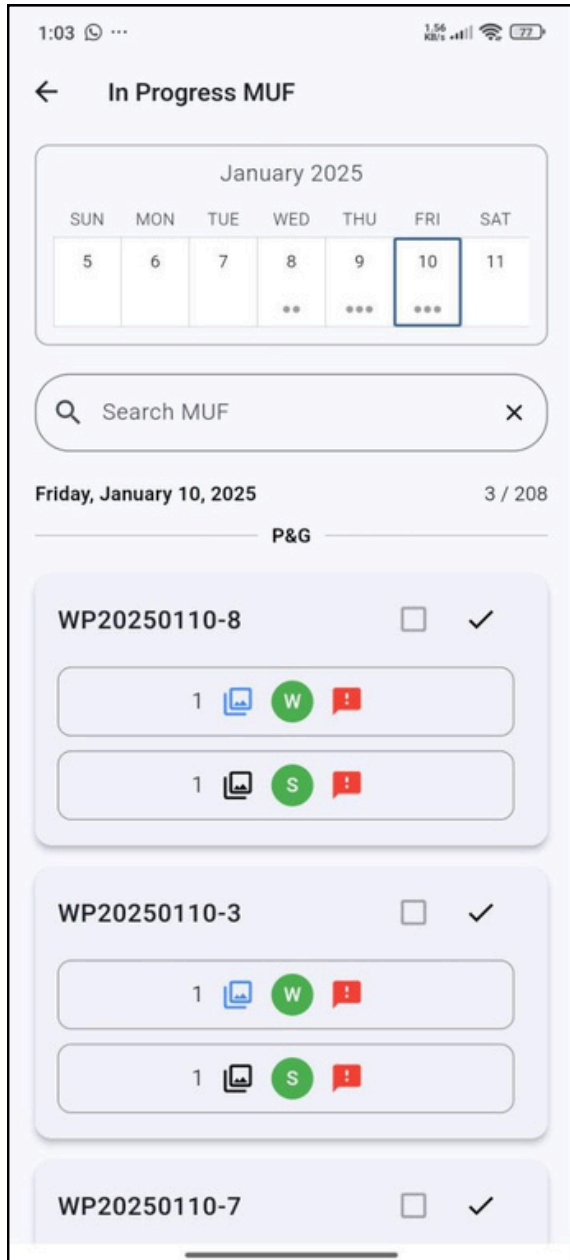

- View images
- View statuses
- view remarks and act accordingly
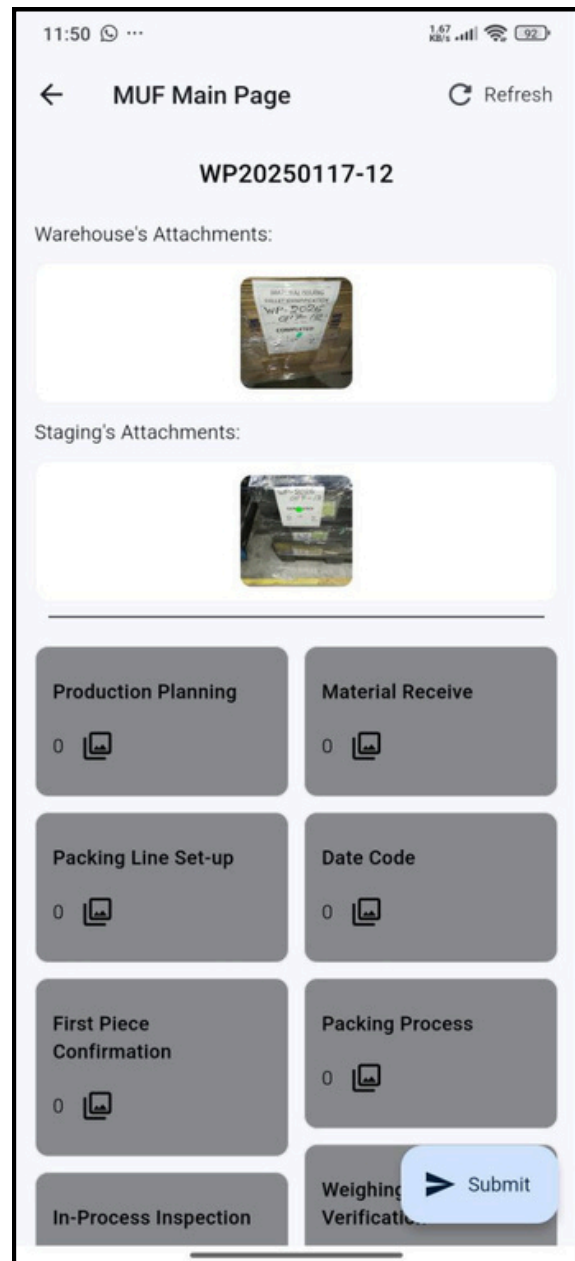

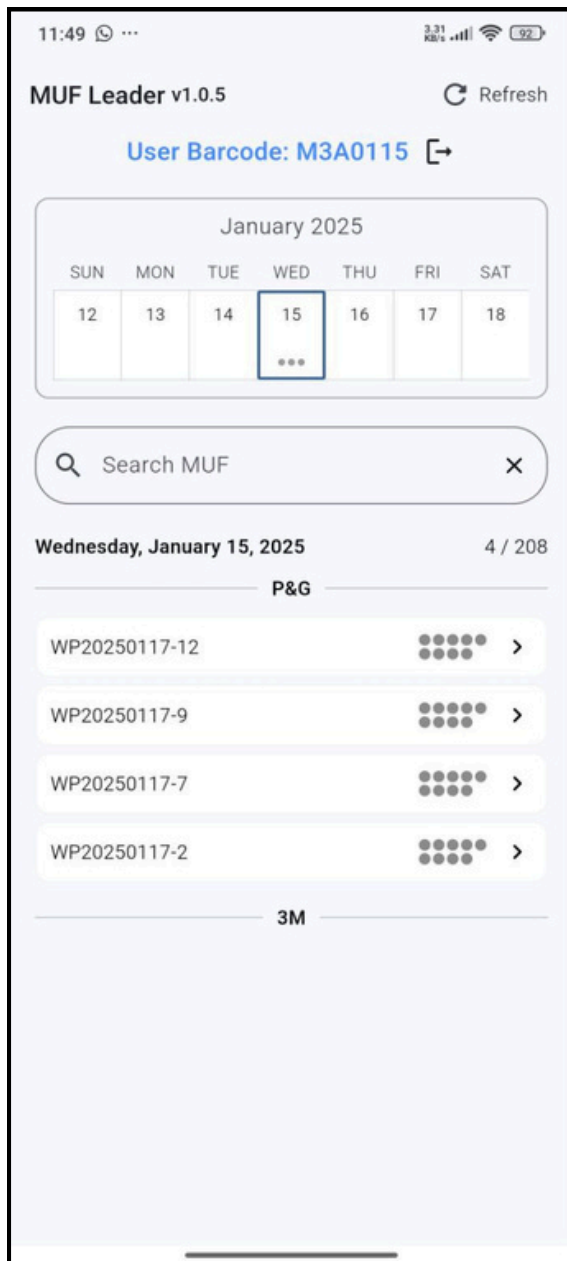

Warehouse App
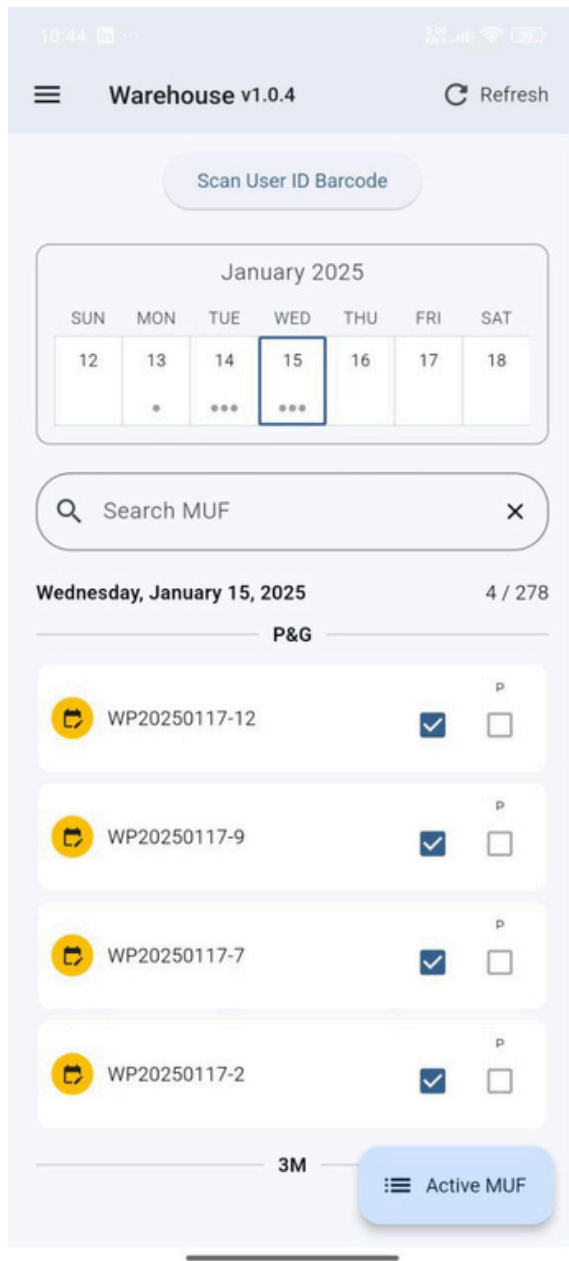

- View active MUF on current date
- Set issue priorities
- View images
- View & set statuses for WH section
